**Public Health**  
Prevent. Promote. Protect.

### ***A MESSAGE FROM THE DIRECTOR OF HEALTH, Fiscal Year 2017***

The Northeast District Department of Health was recognized by the CT Department of Public Health (CT DPH) for being among only 25% of health departments across the State to have delivered all of the essential public health services in Fiscal Year 2016—the first year this was assessed—and among the 44% of departments to have done so in 2017. This recognition is a tribute to all those who work for the District. I cannot thank them enough for all they do—and do so well.

NDDH works in many ways to keep people safe and healthy. Our Putting on Airs program of home visits and medication counseling reduces asthma attacks, asthma-related hospital visits, and missed time at school and work. Our Fall Prevention efforts included training professionals in a form of Tai Ji Quan (TJQ) that effectively reduces falls, and was the catalyst for the *TJQ: Moving for Better Balance* class that opened to rave reviews at the Hale YMCA. Our spoof-song *Gypsy Moth Debris*, written in response to reports of falls on slime from the springtime invasion of caterpillars, went viral sparking great fall-prevention awareness!

In the spring, NDDH worked with CT DPH and WINY Radio to host the very successful *On the Air Water Fair* (resulting in almost 300 local residents receiving free well-water tests for arsenic and uranium) before heading over to Quinebaug Valley Community College to join an outpouring of community partners participating in the *Every Day is Earth Day Environmental Fair*.

NDDH continues to be a leader in efforts to prepare for and respond to public health threats. Our staff help educate emergency response, disaster response, Medical Reserve Corps volunteers and others so they will be able to respond if an emergency arises. We participated in the 2016 *CT Mass Fatality Drill* as we might be called upon to open a Family Assistance Center should there ever be a local event with a high number of deaths.

We shared information on the importance of preparedness with food service establishments reminding them that events such as water main breaks or power interruptions are likely to occur and disrupt their ability to operate. We emphasized the philosophy that NDDH is a community partner contributing to their business success. We encouraged healthy menu options with reduced salt, sugar, and fat and provided guidelines for using locally-sourced foods. These are not only healthy choices; they are choices that help support local business. We believe efforts to promote individual well-being are also important for our community's overall well-being. Establishments with delicious, safe and healthy foods are in a better position to attract visitors who contribute to our regional economic well-being!

We are dedicated to working collaboratively to keep northeast CT happy, healthy and safe!

*Susan Starkey, MPH MS RD*
